

MALTA DISCOVERY

Prehistory Research Foundation

Malta Register Nr. 111

Offers you an Atlantis Study-stay in the Centre of the Mediterranean on the Archipelago Malta with the Islands of Gozo, Comino, and Malta... the Sacred three Mount pillars of the Goddess Ash.tar-ta.ra Queen of Atlantis. Get on; and experience during our exciting course the strongest place of energy on earth with its Atlantean High frequency active auroral power!

ITINERARY

4th June – 14th June 2015

Dates of activities are subject to change.

4th June, Mon
1st day

Depart from gateway cities for Malta.

ARRIVE and transfer to our hotel with Sea view rooms. Introductory meeting and welcome dinner.

5th June, Tues
2nd day

MALTA - Center of Atlantis;

Introduction-seminar with Prof. Hubert Zeitlmair h.c.D;

After the breakfast, by a Seminar you are introduced in the adventure... ATLAN.TIS.

Further you will hear about the "3 significant purpose" of the Megalithe circle temples. The seminar is supported by a PowerPoint presentation, the lime stone model of the Mnajdra temple and Stone tablets engraved with script signs.

After the lunch break, we visit the temple site near by the hotel.

Dinner and thereon a sit together for open discussion.

Ashtar-tara
Queen of Atlantis

The temples once and now

**6th June, Wed
3rd day**

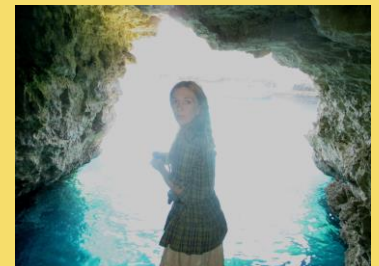

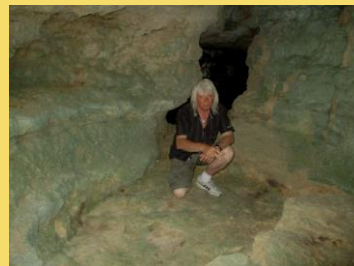

The Sister island of Comino.

After breakfast depart for an exciting full day trip to the former zero point of the Atlantean magnetic power system an experience of the particular kind.

With a Mini bus/Jeep we leave Bugibba for the Cirkewwa ferry terminal. There we depart to the island Comino that also shows the characteristics of an extinct volcano similar to Gozo.

There, on narrow and wider paths, we will explore the island on foot and visit certain places. At these places we get in touch with undisturbed electromagnetic high frequency active auroral energy of the 6th dimension from Atlantean times. The Morphogenetic field have strength up to 460.000 Bovis-radiation units that is doubtless the highest still existing field of strength on earth. Here, we find time for meditation interconnected with spiritual rituals by Nathalie and Christiane.

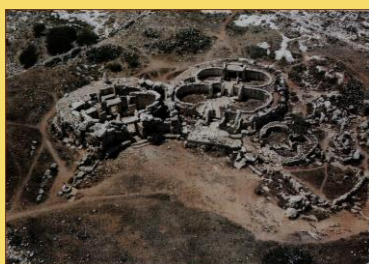

Without question, the stay on this island will be a breathtaking and highly energetic experience full of positive surprises.

In a subterranean Grotto

In the late afternoon return trip to the island Malta and back to the hotel. After the dinner - informal get-together with the exchange of thoughts.

**7th June, Thurs
4th day**

THE Southern temples at the Wied il-Zurrieq.

After breakfast depart for an exciting full day. At the zero point the magnificent Mnejdra Temples you'll feel the magnetic energy in the strength of about 60,000 Bovis radiation units. This is not unusual because Mnejdra and all the other prehistoric temples are connected by invisible pins and the result is a self-adjusting overall whole facility – a vast Power house.

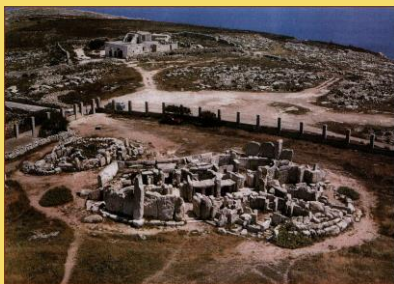

Hubert will explain to you two of the true purposes of this temple and the others, which we will visit together because they are architectural and technical feats even by today's standards. Only Malta possesses such monumental structures, which in the way of construction, orientation, decoration, configuration, and measurement were strictly controlled by a particular order and set of galactic laws. We will then have some private time at Mnajdra temples where the Goddess Ashtar-tara will lead us in her stony womb into guided meditation.

We leave Mnajdra and after a short walk of some 250 metres to the top of the slope we reach the site of il-Misqa. This is a group of sixteen deep wells carved into the bare rock. Because of water removal with illegal drilled holes unfortunately the water comes not up to the surface anymore so the wells are seemingly dry, and are partially filled with loose stones, rubble and mud.

A few of them however, host Fig trees of which only the crown is visible and this is an indication that the tanks are fed from deep water canals. My research has unequivocally proved that the water from all the sites is of a better quality and of a better energetic structure than the water from other sources; for example Swiss water- This water is full of highly charged energy and rich in Calcite carbonate minerals that result in an Acidopoulus healing water. Such water you will get for personally use rom us in Gozo!

We will spend the lunch hour at the Hagar Qim Restaurant nearby. Here you will have time and opportunity for discussion.

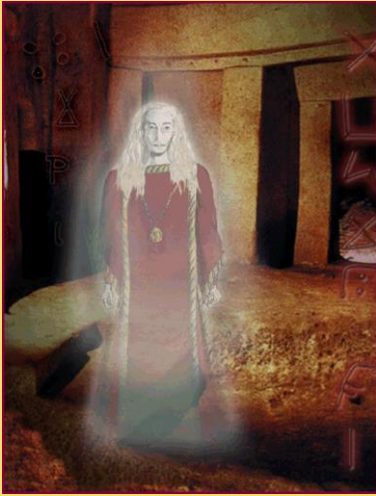

Hagar Qim temple site as Hubert know it from 1992

After lunch and a short walk we will visit the site of HAGAR QIM temple, Malta's' only one Luni-Solar-Sidero-Stone circle calculator. Here you will get a deep insight in the functional principles of the Luni-Solar-Sidero calendar.

You'll experience for yourself how the great Atlantean Leader & Nature scientist Patha-i-dana Asuara ^tSi.dha and his colleagues operated this observatory and how they were able to measure the motion of the moon, the sun and the stars altogether.

Thereafter return to our hotel.

8th June, Fri
5th day

The Lord protector
Pa.tha-i-da.na Asu.ara

Resonance tube opening

MALTA - The Hypogaeum of Hal-Saflieni & die Temple ruin of Tarxien;

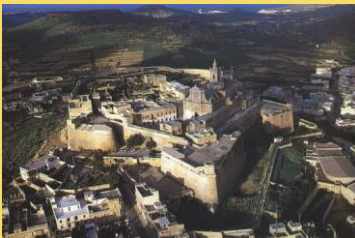

After breakfast depart to the famous site of the HYPOGEUM. This in the soft Globigerina limestone hewn underground labyrinth with temple complexes, passages and normal cavern-like chambers is so far, as well as the above-ground counterparts, unique in the world. The underground labyrinth rescues some unsolved phenomenal puzzles, therefore even the Hypogaeum wrapped an aura of mystery. To solve the puzzle, Hubert will give you answers that make sense. He is the opinion that..

Thereafter we visit the nearby situated temple ruin of Tarxien. This site is the only one that has rebuilt after the downfall of Atlantis during the Minoan epoch, and was used as fertile cult place.

This opening on the picture left was used as sacrifice bowl because there is a strange radiation to be feel. In truth, this is a resonance tube that leads down to the artificially shaped womb. These places can be considered as oracle dots because there the certain frequency allows that sometimes Spirits can be seen here still today.

In the very late afternoon return trip to the hotel. After the dinner - informal get-together with the exchange of thoughts.

9^h June, Sat
6th day

Ashtar-tara
Queen of Atlantis

GOZO, Headquarter of the primeval mother part 1,

After breakfast we depart for another full-day tour. At the Cirkewwa point we will take the ferry to the sister island of Gozo an extinct volcano. Right after landed in Mgarr harbour we leave for the temple ruin Ta Ċenċ on top of the Gozo surrounding rock wall. Here we explore the excavation place for its radiation. This is still a highly energetic place with a strength of radiation of approximately 240.000 Bovis-units. This is an ideal place for meditation; we will therefore include a meditation session with our visit undertaken by Nathalie/Christiane.

Thereafter we leave for the village of Xaghra, to visit the only one in very low attempts restored site of Ggantja. Like Malta... Gozo too has 10 important megalithic remains. In other words, it is a smaller yet older reflection of the stone circles on the main island. Here too but on top of the, the Island surrounding flatted rock-wall, the buildings were erected on magnetic lines following the laws of nature. It is consequently no miracle that the place has a high electromagnetic radiation potential. This is also an ideal place for meditation; we will therefore include a meditation session with our visit undertaken by Christiane/Nathalie.

The lunch break we will have in the village of Marsalforn with a beautiful panorama view to the sea.

In the afternoon we walk up to the citadel, the highest point of the island. During a walk around the bastion we have a wonderful view and we will recognize the Island surrounding flatted rock-wall, and suddenly we get it.. Gozo is indeed an extinct volcano, and the citadel was built upon the biggest of its four cones.

The central point of the citadel however, is the magnificent cathedral, which is dedicated to Our Lady. For us there is no question about because the building was erected upon a temple to Ashtarte the Goddess of the Phoenicians from the city of Carthage. This indicates a very early resettlement of the

Island by people from Mesopotamia respectively Egypt; Ashtarte is a much younger depiction of Goddess Ash.tar-ta.ra!!!

On this place everybody can feel the enormous electromagnetic radiation, approximately 48.000 Bovis units at the main portal and 298.000 Bovis units within the cathedral nearby the main altar.

In Hubert's opinion... Gozo is the most sacred place of the whole archipelago, the place where the primeval Mother of man, the Goddess Ash.tar-ta.ra resided and lived her mysteries. During a short session we will ask for her blessings.

In the late afternoon we return to the island of Malta, and back to the hotel. After the dinner - informal come-together with the exchange of thoughts.

**10^h June, Son
7th day**

GOZO, Headquarter of the primeval mother part 2,

After breakfast we depart for another full-day tour. Again at the Cirkewwa point we will take the ferry to the sister island of Gozo.

This day we focus our attention the western side of the Island. The cliffs behind a small village are exactly in opposition to Ta Ċenċ in the South east. The electromagnetic radiation at the cliffs is about 360,000 Bovis-units. This is also an ideal place for meditation; we will therefore include a meditation session there guided by Hubert.

In the village of Gharb Hubert will guide you to a place where you will make experience with the miracle Acidopoulus healing water that have similar quality than the water of Lourdes!

Thereafter we leave this place in order to visit the Ta' Piniu church that is close by. This church was built upon a magnetic knot point; here everyone can have a private meditation.

The lunch break we spend in the village Xlendi. After lunch we leave for the Dwejra bay where

we will see the fungus rock and the Azure Window. On the Fungus-Rock grows a fungus plant with red blossoms. During the time of the Knights, the plant was considered to have healing powers. The Azure window is a vast rocky arch emerging from the cliffs directly into the sea. The Dwejra Bay is the remaining rest of a broken off a vast cave and water tank system.

In the late afternoon we return to the island of Malta, and back to the hotel. After the dinner - informal come-together with the exchange of thoughts.

**11th June, Mon
8th day**

The western part.. Ta Hagrah temple, the city of Mdina and Rabat catacombs

After breakfast depart to the village of Mgarr because today we will feel the energies of the Island once again as we explore the Ta´Hagrah temple, a further temple site that doubtless belongs to the ensemble of the 36 magnificent Megalithic structures.

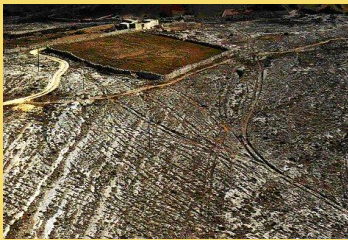

Thereafter we will explore the medieval city of Mdina, the old capitol of the island. This city is considered to be the site of the oldest settlements since the re-colonization after the deluge. At the neighbouring city of Rabat we will visit and explore an underground labyrinth, with passages and cubicles cut into the stone, and used as catacombs during the early Christian era.

In the late afternoon we return to the hotel and free day. **Relax**, explore the small shops, or just enjoy the day.

After the dinner - informal come-together with the exchange of thoughts.

**12th June, Tues
9th day**

Ghar Dalam Cave, Cart ruts, il-Fawwara.

After breakfast, depart for our last full day tour to the cave of Ghar Dalam, the Cave of Darkness. The the rock that forms the cave is of a geologically very old grey Globigerina lime stone consisting of Calcite minerals and Calciteoxyde that has already changed into granite. The cave itself was shaped like a spiral drill by the Atlantean miner. It slopes inwards and gradually narrows for a length of more than 60 meters ending in a tunnel of 90 cm in height that leads further on into the rock. During excavation works, when the mud layer was removed, the fossil remains of 36 different kinds of animal were discovered; animals that under normal circumstances would never stay together. Hubert think that the reason why these animals similar to the human people in the different Hypogeum, were found together was because for some reason they were seeking shelter, that they all escaped together in a state of panic into the innermost part of the cave where they were unexpectedly drowned by water and were finally buried in silt.

Afterwards we drive to see another more puzzling enigma, the Cart-ruts of Clapham Junction carved in solid rock. The legendary Ruts are always in pairs running in parallel lines and appear to run up or down a gradual slope, here and there making a surprising drop or rise over short distances; they are referred to as "cart-tracks", which they certainly **are not**, but were rather intended to collect rain water and were used as a drainage system. Hubert has attempted to seek a link between the ruts, the megalithic temples and the pre-historic water tanks, such at il-Misqa, Sharolla in Zurrieq, Qormi and il-Fawwarra and have succeeded in finding the link. In this regard we will explore the water tanks at the site called il-Fawwarra and Hubert will explain what he found. This is a place of high energy where we hope to meet Spirits.

**13rd June, Wed
10th day**

**The city of the Knights of Malta...
Valletta**

After breakfast depart to the capital city of Valletta. There we will visit the Museum of Archaeology.

Thereafter we have a small sightseeing through the nice city by foot and then free afternoon.

In the late afternoon we return to our Hotel and Farewell Dinner.

**14th June, Thurs
11th day**

Depart for home. (B)

Departure options depend on flight schedules and continuation plans
